Professional Summary

Results-driven software developer with experience building full-stack applications, from responsive financial dashboards to scalable SaaS platforms. Skilled in **Python, Node.js, and React.js**, with a proven ability to architect and deploy **microservices**, automate manual processes, and optimize data-intensive systems. Proficient in cloud-native environments (**AWS, GCP**) and end-to-end **CI/CD** automation.

Experience

Barclays

Aug 2022 – Nov 2024

Software Developer

- Developed and deployed responsive financial dashboards using **Python, Fast API, React.js, and TypeScript**, automating manual report reviews and saving an estimated **\$8000/month** in auditor time.
- Utilized **KDB+ and SQL** to query **100k+** daily financial transactions, improving data retrieval efficiency for complex queries by **15%** through optimized design.
- Designed user-friendly interfaces with **React.js** connected to a **KDB+** backend, decreasing audit completion time by **40%** and increasing auditor satisfaction by **10%**.
- Operated within an **Agile** environment to deliver monthly releases, utilizing **CI/CD pipelines (Team City, OpenShift)** and ensuring **90%** code coverage with **SonarQube**.
- Tech Stack** *Python, Flask, TypeScript, React.js, Material UI, SQL, KDB+, Pandas, Spark, Docker, Jenkins*

Mamaearth

Jan 2022 – Jun 2022

Software Development Intern

- Spearheaded the development of a User Colab & Research **SaaS platform** to enable targeted surveys, contributing to a **10% increase** in user feedback.
- Implemented a responsive JavaScript web SDK for data capture from **5K+ daily user interactions**.
- Engineered and deployed **Node.js (Express) and React.js microservices** via **Docker and GitLab CI/CD**, achieving **20% faster** release cycles.
- Tech Stack** *Node.js, React.js, JavaScript, MySQL, Redis, AWS, GitLab CI/CD, Docker, Jenkins*

Projects

HealthFlow [GitHub](#) [Live Project](#)

- Engineered a full-stack system with a real-time **React** dashboard (**WebSockets**) to automate the generation of **.docx** medical reports, replacing a manual process.
- Containerized the application with **Docker** and automated the deployment process using a **CI/CD pipeline** with **GitHub Actions**, ensuring reliable updates.
- Tech Stack** *Python, Flask, React, TypeScript, PostgreSQL, Socket.IO, Material-UI, Tailwind CSS, Google Cloud, Docker*

Textify [GitHub](#) [Live Project](#)

- Built a **Python NLP web app (BERT)** for on-demand text summarization from documents and scraped URLs, deployed via an automated **CI/CD pipeline**.
- Implemented features for on-demand web scraping and visual analysis through **word cloud generation**, improving user engagement and data interpretation.
- Tech Stack** *Python, Flask, BERT, Scikit-learn, Pandas, Newspaper3k, Bootstrap, GitHub Actions, Google Cloud, Docker*

ShieldAI [GitHub](#) [Live Project](#)

- Developed a privacy-preserving ML system using **Partial Homomorphic Encryption (Paillier)** to perform inference on fully encrypted user data.
- Engineered a complete, secure pipeline where users submit encrypted data and receive an encrypted prediction, which only they can decrypt.
- Tech Stack** *Python, Flask, Scikit-learn, Pandas, JavaScript, Paillier, Bootstrap, Docker, GitHub Actions*

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++

Front-End: React.js, Material-UI, Tailwind CSS, Bootstrap

Back-End: Node.js, Express.js, Python (Flask, FastAPI), KDB+

Databases: MySQL, PostgreSQL, MongoDB, Redis, Spark, SQLAlchemy

Cloud & DevOps: GCP, AWS, Docker, Jenkins, GitLab CI/CD, GitHub Actions, TeamCity, OpenShift, Nginx

Developer Tools: Git, GitHub, GitLab, SonarQube, Jira, Selenium, Pandas, Postman

Education

Thapar Institute of Engineering And Technology

B.E. in Computer Engineering

Patiala, Punjab

May 2018 – May 2022
